

The scores and grade point averages shown above are averages for those students selected in the initial selection of LPN Transition candidates. All qualified applicants are ranked via a 100 point ranking system based on their prerequisite GPA (45%), their composite TEAS score (50%) and their county residency (5%). Residency is determined based on the mailing address listed on the driver's license submitted with the application only. Students not selected maintain their score and ranking. If and when a seat becomes available, those students are contacted in the order that they are ranked until all seats are filled for the term.

These are averages only and are not associated with an individual applicant. Because they are averages, some students selected may have scores or a GPA above or below the average in one or both categories listed.
